

DO YOU HAVE POOR VISION AT NIGHT?

Night myopia affects one out of three people, making it difficult to see distant objects at night. **inMotion™** addresses this problem with its night vision zone, providing an improved visual quality.

ADVICE FOR GOOD NIGHT-TIME DRIVING

- Reduce your speed.
- Keep a safe distance behind the car in front of you.
- Frequently look in your rear-view mirrors.
- Use the high beam lights whenever possible.
- Reduce the brightness of your instrument panels
- Stop at a service area to rest when you feel tired.

For safe driving, remember to schedule a regular eye exam.
