ARE THE ONLY TRUE  
NARROW BAND  
GREEN LIGHT FILTER  
ON THE MARKET**

"With PTSD, I have horrible headaches.  
Almost daily, the sudden pain of a  
headache disrupts my work and time with  
family. I am amazed at the relief I feel  
when wearing MiOptics - I don't leave  
home without them." — David H.

"Very soon after putting on  
the glasses, I felt my body  
**relaxing into a deep calm and  
my nausea faded away."**

— Maria S.

- No Side Effects

# HOW WORKS

The **colors in full spectrum light** create micro-electrical signals (neurostimulation) in the eyes and brain that **can trigger a variety of symptoms**.

For those suffering headaches associated with anxiety or PTSD, this may cause debilitating pain.

MiOptics **patented technology filters out all of the colors in the light spectrum** with the exception of a very narrow band of light.

We know that exposure to only a very **NARROW BAND of GREEN LIGHT** (nbGL) reduces triggers to the brain that cause pain and disruption to daily activities.

Seeing only a **TRUE NARROW BAND of GREEN LIGHT** can soothe symptoms, helping you to return to normal functioning and improved quality of life.

Other lenses on the market are not true nbGL.

MiOptics lens technology is true nbGL.

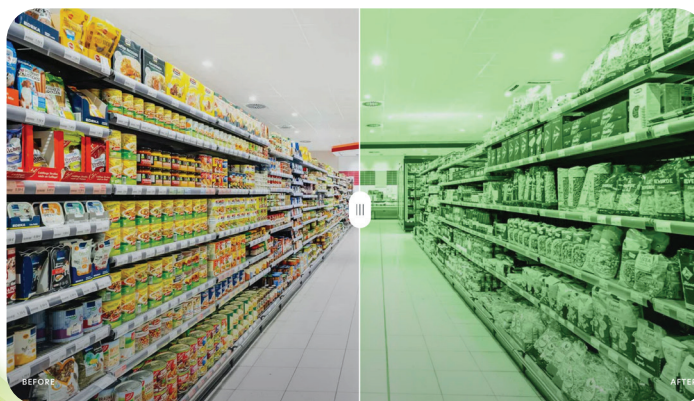

The **SCIENCE** is clear

MiOptics targets the root cause of overstimulation from everyday light.

Developed alongside world-renowned experts like Harvard's Dr. Rami Burstein, the science of nbGL therapy is published in leading journals such as *Brain*.
